**Re: Industrial Water Training Services (IWTS)**  
**Testimonial:**

I have been working with both Peter Jackson and Val Perrin for a number of years now in relation to safety training and advice, and although the IWTS training facility is quite new they have been providing our Civil Engineering Operations Division with all aspects of health and safety, utility and management training for many years. I have always found the training content to be of a very high professional standard, in accordance with up to date legislation and delivered by the finest of adeptly competent tutors.

Due to the nature of our works we have also had some bespoke courses created and conducted for our own training needs and the IWTS team is aware of the importance of my team's early stage involvement to ensure our requirements are fulfilled.

Pete, Val, Nicole and their team pride themselves on the quality of their training facilities and understand the importance of customer service ensuring that delegates return time and time again.

We find them very reliable, honest, trustworthy and more importantly they reply to our requests promptly, send booking forms immediately and turn certification around very quickly and this is extremely important within our business.

We would have no hesitation in recommending IWTS to any other company or third party who require a proficient all round training experience.

Yours sincerely

Ian Evans
